

JVC Partners

JVC Professional partners are industry leaders who, together with the integration of JVC's protocol, provide a comprehensive range of surveillance systems. JVC Professional's partners include a number of the largest providers of security solutions for the worldwide security industry.

Aimetis is a leader in intelligent video surveillance software which helps organizations around the globe stay current with the industry's best practices and technology innovations.

AMX offers software solutions which simplify customer interaction with technology. They aim to solve the complexity of managing systems and provide total control of intruder security systems.

Artec technologies develops, produces and distributes software based solutions including additional hardware components as well as complete systems in the areas of digital video surveillance and video technology (Digital Video Security) and also digital transmitting and recording technology of audio and video content for intranet and internet communication, e.g. IPTV (Digital Streaming Video).

Axxon is a leading software developer that combines IP-based physical security management, intelligent video surveillance, and an enterprise-wide platform into fully integrated vertical and horizontal solutions. Their solutions help

governments, institutions, and commercial enterprises of any size protect their people and facilities, prevent asset loss and damage, and improve business efficiency, all at the same time.

Codestuff is one of the UK's leading brands associated with innovative IP video integration. Famous for inspirational and creative leadership, Codestuff deliver tailored video management solutions to the security industry.

DiViCro is an intelligent video surveillance and IP management software that allows you to process vendor IP signals. The surface consists of freely positioned video windows. From the single representation of the 4-split up to 50-fold display, everything is possible, from standalone base to complex server solution. The software has an optional OPC server for easy expansion into a higher management (eg Schille system PVis).

Offering a range of IP-videos to recording systems, eneo is a specialist for video surveillance products. Their portfolio features more than 650 products and solutions of which follow strict quality standards (EN ISO 9001:2008).

Funkwerk plettac electronic GmbH is a subsidiary of Funkwerk AG and provides electronic and mechanic security systems and a wide range of video security system solutions.

Genetec is a pioneer in the physical security industry and a provider of world-class IP security solutions to international markets such as transportation, education, retail, gaming, government and more.

GeoVision have Digital Surveillance Systems ranging from the cost-effective 20 fps to the leading-edge 480 fps models, choices ranging from BNC to D-Sub, built-in to standalone I/O modules.

GEUTEBRUECK, experts in security for a wide variety of applications, provide system management for all surveillance needs. As Microsoft gold partners they provide reliable IT solutions for the security market from analog to hybrid to pure IP, on the GeViScope Enterprise Surveillance System.

Griffid offers broad based intelligent, user friendly complete video and event management system software that provides true digital surveillance management. The software enables users to view, record and manage live video network cameras, video servers and digital video recorders (DVRs). Easy integration with other systems like parking systems or POS integration is possible and you can create I/O routings very easily with graphically orientated profiles.

HeiTel Digital Video develops, manufactures, and distributes well thought out hardware and software solutions, ranging from stationary stand-alone applications with optional Multi-Site support, through mobile applications to sophisticated control centre applications with Server/client functionality for new and existing alarm centres.

I-Comply are specialists in a range of CCTV management and control solutions. Their products include: Video Control and Administration Systems, Network Video Recorders (NVRs), IP Based Camera Switching and Redeployable Cameras and IP Transmission.

J2K Video Ltd is a technology company that provides specialist CCTV solutions to the security industry.

Logiware gmbh is a software company specialising in the development of video surveillance and recording systems. Logiware has become successfully established as an innovative application in many companies both in Germany and abroad.

Milestone XProtect is the best open platform IP video management system you can get. It acts as the core of your surveillance system, connecting all the hardware of your choice for an optimal, integrated solution. The software is offered in tiers as packaged solutions scaled to different business needs.

Mirasys, based in Finland, develops and supplies the software that helps organizations manage the information captured by digital video and CCTV cameras.

NETAVIS Software is a pioneer of server based IP video surveillance. Focusing on scalable and flexible solutions, NETAVIS is fully able to meet its customers' requirements. Its product family is robust and based on open standards capable of delivering cost-effective solutions for many different applications.

NICE Systems provide security solutions which empower security personnel to detect, prevent and respond to threats in real-time. NICE solutions provide real-time video analytics, IP networking, recording and management for automatic threat detection and also provide advanced solutions for a variety of security markets.

SeeTec is a Value Added Distributor for the most renowned network camera manufacturers. With our proprietary camera management software, they are in a position to provide multivendor consulting geared towards the intended application

SureView Systems is dedicated to improving the business performance of its clients, partners and resellers by providing exceptional products and services for the security marketplace. SureView partners with

manufacturers, integrators and major monitoring stations to distribute the Immix platform and enable world-class security solutions.

SIEMENS

SiNVR SiNVR is a Siemens Management-Software for network-based video-monitoring and recording. It's easy to build a network video system that combines the benefits of analogue and digital systems. No surveillance system is too small or too analogue that it cannot benefit making the transition to network video technology. Even a single analogue camera connected to a video server will give you a full range of advantages that come from digital, networked surveillance.

Synectics has a long and successful track record of providing innovative and comprehensive solutions for CCTV systems across many industrial sectors.

Verint@ Systems is a leading provider of Actionable Intelligence® solutions for enterprise workforce optimization and security intelligence. They help enterprises make sense of the vast information they collect in order to achieve their performance and security goals.

IDCS's main objective: Integrated Security Systems for applications with high security demands in medium to high sized projects. One system for different applications: Access Control, Intruder detection and technical alarms, Digital Video recording, Visitor Control, Guard Tour Control, Presence Control, Private Car Park Control and Time and Attendance. IDCS which was acquired by **VSK** is now part of electronic security division of the holding **Xtralis**.
