### **Description**

17-inch LCD monitor designed specifically for the professional security and surveillance market. Built to the highest specifications, it combines superb visual performance and precise high resolution images.

## Main features

- Fire-retardant front cabinet and metal rear cabinet
- Non-glare panel for 24/7 viewing
- Tilt positions are easily adjusted for operator viewing, with easy to operate front panel controls
- Built-in power supply and the option of a rack mount adaptor (RK-C179L2EA)
- Accepts Video BNC, VGA and DVI input signals for use with analogue and digital network recording equipment
- High performance picture quality with new Picture Modes (Standard/Dark Enhanced/Vivid/Dynamic)
- 1300:1 High contrast (1000:1 for LM-H171)

## Additional features

When operating the four picture modes (standard, dark enhanced, vivid and dynamic), the LM-H191 allows users and installers to select their screen image to a desired performance and ensuring the best quality captured image during the day or night.
