Description

The new DLA-RS20 brings THX® certified performance to your home theater! From its incredible 50,000:1 native contrast ratio to a new level of color accuracy, brightness and ease of use, this projector is in a class of its own. JVC has refined its Reference Series line of projectors by developing a new high precision 17 element motorized lens with an upgraded optical path, and by incorporating the Silicon Optix's HQV Reon-VX processor. Sporting a stylish yet functional new design and pearl black cabinet, the DLA-RS20 is simply the finest 1080p home theater projector you can buy.
