COMPANY PROFILES FOR THE OPEN DAYS

GUARDIAN SECURITY AND COMMUNICATIONS LTD

Integrated Installer and Total Solutions Provider

Guardian Security and Communications has formed direct partnerships with some of the worlds leading manufactures to bring all our technical expertise together and become a “one stop shop” for all security and networking solutions.

Our aim is create a professional and comprehensive service in an integrated format thereby supplying a total package from the design, implementation and after sales. This includes Access Control Equipment, Video Surveillance, Intruder Detection and **all from one installer.**

We also cover Buildings Management Systems, Rising bollards, Turnstiles, Access Equipment, Security Barriers and offer a wide range of services across the communications spectrum.

SIEMENS BUILDING TECHNOLOGIES

Building Management Systems - Essential in today's climate

Energy savings of up to 30% with intelligent building automation

Building automation is flexible, easily integrated and energy-efficient and Siemens has control systems that cover all relevant building services. The controllers are not confined to heating, ventilation and air conditioning, but also include lighting, window blinds, safety and security, access control and electrical power distribution.

Siemens' range of access control products and systems offers customers true peace of mind by providing freedom of movement in a secure environment. Their products and systems are flexible, scalable and easy to use. They meet customer needs that range from providing security at a single door to overcoming the security challenges faced by very large multinational corporations with thousands of doors and cardholders at different locations around the world using hands free technology.

JVC PROFESSIONAL EUROPE

World leader in C.C.T.V., recording and monitoring

JVC Professional Europe Ltd. is one of the world's leading manufacturers and suppliers of a wide range of sophisticated high quality broadcast, professional, recording, playback and presentation equipment, along with computer imaging, internet communications, data storage solutions and CCTV. For more information about our CCTV and surveillance solutions please attend the open days.

OPTEX – Worlds leading manufacturer in Infrared detection devices

Optex is the world's leading manufacturer of infrared detection devices for the security industry, with over 30 years experience in the manufacture of specialist internal and external detection technology suitable for domestic, industrial, commercial and very high security installations.

Optex was the first company in the world to take technology that was more commonly associated with military and medical fields and start using it in the development of security sensors for commercial (and subsequently residential) applications

COMMEND UK

Commend UK, (the new name for Complus Teltronic Ltd) are a leading manufacturer of Intercom Solutions for the security and communication markets. Supplying programmable IP and Digital Intercoms for a variety of applications, which include; Car Parking; Lifts; Disabled Refuge; Rail; Custodial and Medical. Advances in IP technology have meant that intercom solutions are constantly being developed, to meet ever changing market needs.

ADITECH - Specialists in providing Iris Recognition Technology & Solutions

Aditech Ltd is a Biometrics company who provide a wide range of Iris Recognition Technology & Biometric Solutions, including both hardware and software products, to a broad range of markets where the need for accurate identification of individuals is paramount.

In addition, Aditech continues to develop both hardware and software products to be able to provide a seamless integration of an Iris Recognition System into customer applications, such as access control and time & attendance.

This technology is very versatile and can be implemented in all types of applications including schools, offices, warehouses and even residential applications. These are great alternatives for easy registration, secure access and time and attendance. These are all cost saving solutions which are vital to any organisation.

WAVESIGHT - Communication Innovation

Wavesight is Europe's leading innovator in the design, manufacture and supply of broadband wireless and fibre solutions for the secure transmission of data, voice and video. Wavesight is a highly focused, energetic business with a lineage that can be traced back to the creation of EMI in the 1930's; a heritage of technical innovation responsible for many of the world's greatest communication technologies.

A global communications provider

Across the world, thousands of organisations use our products to cost-effectively connect their networks, cutting their communications costs and driving their profitability.

Wavesight has over 3,000 installations in more than 50 countries, working with a growing community of System Integrators, VAR and OEM partner.

FARSIGHT

We're Farsight, and we protect millions of pounds worth of property remotely via the web and internet-linked video cameras sited at our clients' premises. We're a quick-response remote video monitoring station and we're on duty 24 hours a day. Our surveillance staff keeps a constant eye on factories, warehouses, car parks and showrooms filled with valuable stock and equipment, as well as offices occupied by vulnerable staff.

From Edinburgh to Exeter, our sharp-eyed gaze responds to every suspicious movement. If we see an intruder, we call the police; if there's an audio link, we warn the intruder off. In an average month, we'll prompt numerous arrests and prevent tens of thousands of pounds worth of damage. We are instrumental in preventing injuries and saving lives too.

LEASE UK

One of our partner companies who provide lease/finance facilities for businesses across a wide range of market sectors. Lease UK are highly experienced in providing financial solutions to suit any budget at very competitive prices. Leasing is one of the most efficient ways to acquire new equipment and has become a very useful tool in the current climate, as it allows you to leave capital in your business.

FURTHER INFORMATION

Come and enjoy this unique opportunity and see the very latest technology from some of the world's leading manufacturers of electronic security.

You will be able to gain hands on experience with the equipment and see full integration of all the services available and where it could possibly fit into your own working environments.

There will be a brief presentation given by each exhibitor, but the main objective is for you to ask any questions you have and to move around the stands at your leisure.

We will be having four sessions over the two days starting at 10am-1pm and 2pm-5pm with refreshments available throughout the day.

If this is something that you or a colleague from your organisation would be interested in attending please could you email us on

info@guardiancommunications.co.uk

to let us know which session you would prefer or fill in the on-line form at

www.guardiancommunications.co.uk

We look forward to seeing you there.
